Software Experience: Framer · Figma · IMovie · Google Suite · Canva · Zoom · WordPress · Microsoft Excel · Capcut · PowerPoint · Slack · ChatGPT · Claude.ai · Gemini

Technical Implementation: HTML · CSS · Git · Java · Javascript · React.js · Tailwind CSS · REST APIs · Python

Design Expertise: Branding · Copywriting · Time Management · Social Marketing · AI & Prompt Engineering · Data Analytics · Leadership · AI/ML · Object Oriented Design · Communications · Visual Design · Wireframing/UI Mockups · Usability Testing · UX Research · Research

Education

Boston University | Bachelor's Degree

Computer Science & Theatre Arts · Grade: 3.9 · Graduation: May '26

Relevant Coursework: Internet Tech & Web Programming; Software Development; Python; Java; Spark! UX X-Lab Practicum; Clubs/Organizations: Hack4Impact

Work Experience

Web Developer & Design Consultant Feb '25 - Oct '25
Hamlett Films · London, UK

- Transformed film company's fragmented digital presence into cohesive user experience, driving 40% increase in client inquiries.
- Implemented a content calendar to report on key global events, resulting in increased social media engagement and brand awareness.
- Leveraged technical background to optimize user experience through strategic JavaScript and HTML improvements.
- Navigated complex client requirements and technical constraints to deliver solutions that exceeded both creative and business objectives.

UI/UX Designer Sep '24 - Jan '25
SPARK · Boston, MA, USA

- Led comprehensive user research initiative across 15+ usability sessions, generating actionable insights that increased user task completion by 40%
- Guided a team of 8 designers and developers in rapid design sprints, consistently shipping high-quality frames for local and global non-profit organizations.
- Established component library using Figma, improving design consistency and reducing developer handoff time by 60%
- Self-taught and implemented Tailwind CSS under 1 week deadline to eliminate translation gaps between design and development.

Projects

Boston Voter App Dec '24

github.com/ChloeMcFarlane/BVA • github.com/ChloeMcFarlane/BVA • Figma, React, Tailwind CSS

BVA provides voters with detailed information on Boston officials across municipal, state, and federal levels, with integrated tools for voter registration and polling location lookup.

- Led a cross-functional team of 8 designers and developers to conceptualize and build web app across multiple platforms.
- Served as the technical liaison between design and development, translating design mockups from Figma into clean, functional code using Tailwind CSS.
- Successfully managed project timelines and delegated tasks, culminating in a cohesive, centralized product that streamlined the voter information process.

Kaleidoscope Collective Dec '24

Figma

Kaleidoscope aggregates community accessibility feedback and generates personalized recommendations based on individual user accessibility requirements.

- Conducted extensive usability testing, directly improving the user success rate to 100%
- Led cross-functional design critiques to navigate project bottlenecks and align stakeholders on strategic product goals, directly ensuring an exceptional and unified user experience.
- Created and implemented over 20 new frames for a final prototype.
